DETAIL OFFICE ACTION

1. claims 1-15 are pending in the Application.

Election/Restriction

2. Applicant's election **with traverse** of claims **10-15** in the communication with the Office on July 14 2005 is acknowledged.

Because Applicant did not distinctly and specifically point out the supposed error in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Applicants have the right to file a divisional, continuation or continuation-in-part application covering the subject matter of the non-elected claims.

The traversal is on the ground(s) that see the election paper. This is not found persuasive for the following reasons:

A/Applicant has not proved that using the method of claim 10 to fabricate the alleged device proposed by the examiner is not a feasible method.

B/ another example is that using the method of claim 10 it is possible to make a digital delay line that is materially different from claim 1.

C/ moreover because the fields of search for method and device claims are **NOT** coextensive as evidenced by their different classification and the determinations of patentability of method and device claims are different, that is process limitations and device limitations are

Art Unit: 2818

given weight differently in determining the patentability of the claimed inventions and the strategies for doing text searching of the device claims and method claims are different. Thus, separate searches are required.

The requirement is still deemed proper and is therefore made **FINAL and non-elected claims 1-9 are withdrawn from consideration.**

3. This application is in condition for allowance except for the presence of claims 1-9 directed to inventions of non-elected claims or dependent of non-elected claims with traverse in the communication with the Office on July 14 2005 . Applicant is given TWO MONTH or SIXTY DAYS from the date of this letter, whichever is longer, to cancel the noted claims or take other appropriate action (37 CFR 1.144).

Prosecution on the merits of this case is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213. except for consideration of the above matter.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

4. When responding to the office action, Applicants are advised to provide the examiner with the line numbers and page numbers in the application and/or references cited to assist the examiner to locate the appropriate paragraphs.

Conclusion

5. The prior arts made of record and not relied upon are considered pertinent to applicant disclosure: Xiang et al. (US patent 6,255,219) disclose a method for fabricating high performance submicron MOSFET with lateral asymmetric channel.
